

MAKE A POWERFUL CONNECTION

Are you interested in providing internet and technology services to your cooperative members? Are you looking for a partner who has the technology you need to help make that dream a reality?

CTC is a full-service technology provider and advisor for fiber-to-the-home and wireless networks. CTC partners with electric cooperatives, municipalities and communities to bring in-demand services to homes and businesses. CTC has the network infrastructure and relationships to connect communities to state-of-the-art fiber and wireless networks. We will offer direction, leadership, and technical expertise throughout the entire process.

“The partnership we have with CTC has continued to be instrumental in the success of our fiber projects and is a cornerstone in our long-term plan. From the onset, CTC assisted us in creating a plan that would best fit our community’s needs, to ensure we were successful. Today we are able to utilize CTC’s expertise and resources to continue to grow and advance our services.”

— Arrowhead Electric Cooperative

- Consulting
- Tech & Customer Support
- Wholesale Bandwidth
- Video Transport
- Network Monitoring
- Engineering
- Dispatch
- Provisioning
- Sales & Marketing
- Product Development
- Business IT Solutions

Successful Partnerships

- **Internet deployment** of the first 10 gigabit fiber ring in the Brainerd Lakes area of Minnesota – partners included ISD 181, The City of Brainerd, The City of Baxter, Essentia Health, and Crow Wing County.
- **Collaboration with city and local organizations** to deliver fiber Internet to their main business corridors to help sustain and attract new businesses to their communities. The City of Little Falls and The City of Long Prairie are two recent municipal partners.
- **Telecom management services** including direction, leadership and technical experience to city

and staff of both Crosslake Communications (municipally owned) and Lake Connections (county owned).

- **Electric cooperatives.** The latest in technology and services, coupled with member demands for broadband, is a key driver for today’s electric cooperatives. CTC has established strong and lasting relationships with electric coops - like Arrowhead Electric Cooperative in Lutsen and Mille Lacs Energy Cooperative in Aitkin - to expand fiber to improve their operations and bring high-speed, reliable internet to their members.

CTC has the experience and has made the technology investment to help electric cooperatives execute and maintain their fiber networks.
