

PARTNERSHIPS BY THE NUMBERS

**\$15
MILLION**

Since 2010, CTC has helped to secure over \$15 million in federal and state grant funding in order to support our partners' efforts to offer fiber internet.

↑ 3%

A home's value increases an average of 3.1% when fiber internet is installed.

Fiber's two-way transmission speeds of over a gigabit per second are far superior to the average national speed of 12 megabits via traditional cable or DSL.

**ONE
GIG**
(1,000Mbps)

7K

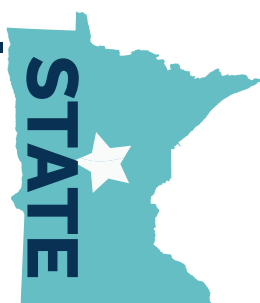

Because of our partnerships with electric coops, over 7,000 homes and businesses now have fiber-to-the-premise services.

2,983
route miles of fiber

Over the past 10 years, CTC has invested over \$85 million in network upgrades. That's an average of \$6,218 per customer!

multi-

Although centrally located in Minnesota, our partnerships extend throughout the nation via business services, shared networks, and collaborative projects.

MEMBERSHIPS MATTER

CTC service areas have been certified Smart Rural Communities and are Gig-Certified by the NTCA - The Rural Broadband Association. CTC is also a member of CNS, MTA, MREA, and several other local and national industry associations.

CTC has the experience and technology investment to help municipalities and electric utilities improve broadband connectivity and competition through our unique public-private partnership model.
