

QUICK START GUIDE:

Setting up your GigaSpire

1

Locate the 803G (Modem/ONT) and connect the power. Wait 15 minutes. Before continuing, the power, broadband, and service lights must be green.

2

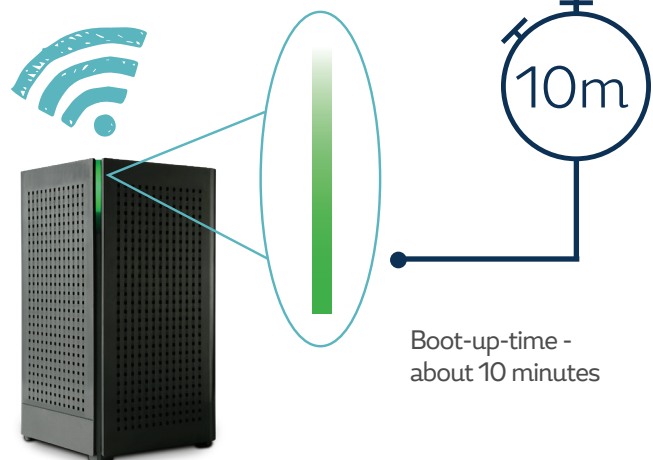

Connect GigaSpire Blast to ethernet cable in the white WAN port located on the back of the GigaSpire. Then connect the power.

3

The solid green light indicates SUCCESS! You are connected to the Internet.

4

Refer to the Quick Start Guide for the App to set up your WiFi.
