- Hosted PBX Phones
- Business TV and Music
- IT Services

*Businesses big or small,
we serve them all!*

YOUR BUSINESS, POWERED BY CTC FIBER

CTC owns and operates our own fiber optic network.

What does this mean for your business?

With our dedicated fiber optic internet, you'll experience symmetrical upload and download speeds that far surpass conventional DSL and cable speeds. As business operations rely more heavily on internet for transactions, security, operations, accounting, and general communication the need for speed and reliability increases. By investing in CTC today, you are investing in the continued delivery of new technology that will drive new and improved services - essential to business communication in the future.

Whether your office is in Brainerd, Babbitt, or Buhl, CTC's dedicated fiber network helps to boost your business' bottom line.

Business Benefits of Fiber

- **Speed:** CTC's fiber internet offers speeds up to 10 Gigabits per second (10,000 Mbps per second) - 1,000 times faster than the national average.
- **Bandwidth:** the superior bandwidth of fiber means that even with dozens of internet-enabled devices running across your network, you won't run out of capacity.
- **Cloud Usage:** with speed and powerful bandwidth, fiber allows you to download and upload files quickly and efficiently.
- **Reliability:** fiber networks are stronger and more reliable than copper wire, and less susceptible to natural elements. Fiber enjoys nearly 100% uptime.
- **Future-Proof:** data demands will only increase as time goes on. Fiber internet gives you the tools today that your business will need for tomorrow.

TECHNOLOGY FOR BUSINESS

CTC remains on the cutting edge of technology. We continue to invest in systems and processes to keep up with the industry's constant changes. So, as you grow, we grow.

We remain committed to providing services that help you communicate more effectively and efficiently with your clients, vendors, or employees.

Our investment in technology means that your business will have advanced communications, managed by 24/7 network operations and skilled, local support.

Sales Engineer

LOCAL, ONE-STOP SUPPORT

No need to call multiple places! Our team is well-versed in all areas of IT services, high-speed internet, hosted phones, PRI and SIP, as well as business TV and music services.

No need to wait on hold! Our customer service team is ready to take care of any your technical needs or questions.

No need to DIY! Our skilled team of technicians is ready to help. We provide one-on-one support through phone calls, video chats, online tutorials, text messaging, or in-person visits.

As a local cooperative, CTC has been serving rural areas since 1952. We understand what makes small communities thrive. Our employees are active community members and take part in many volunteer efforts to give back to the communities where they live, work, and play.
